

PALLET FORK - HYDRAULIC

EDGE® PALLET FORKS WITH HYDRAULICS

The EDGE pallet forks with hydraulics come in three different styles: rotating, side shift, and sliding tine. All three options feature the walk-through style, allowing easy access in and out of the cab.

Rotating Hydraulic Pallet Forks

The EDGE rotating hydraulic pallet forks are ideal for loading palletized materials on uneven surfaces. They feature manually adjustable 48" tines, and are hydraulically controlled right from the cab and rotate up to 180 degrees. (3,700 lb capacity at 24" load center)

Side Shift Hydraulic Pallet Forks

The EDGE side shift hydraulic pallet forks are hydraulically adjusted from the cab to shift side to side up to 16" travel (8" right and left). They are available in 42" or 48" tine lengths and are manually adjustable. (3,700 lb capacity at 24" load center)

Sliding Tine Hydraulic Pallet Forks

The EDGE sliding tine hydraulic pallet forks are ideal for clamping and are also referred to as nursery pallet forks. The operator can hydraulically control the position of the pallet fork tines right from the cab. They are available in 42", 48", and 54" tine lengths that are adjusted together to keep the load centered. (3,700 lb and 5,500 lb capacity at 24" load center)

SPECIFICATIONS

Hydraulic Type	Description	Weight (lb/kg)	Capacity (lbs/kg) at 24" Load Center	Tine Length (in/mm)
Rotating	Rotating Pallet Fork 180 Degrees	700/318	3700/1678	48/1219
Side Shift	Side Shift Pallet Fork with 42" Tines	770/349	3700/1678	42/1067
Side Shift	Side Shift Pallet Fork with 48" Tines	790/358	3700/1678	48/1219
Sliding Tine	Sliding Tine Pallet Fork with 42" Tines	540/225	3700/1678	42/1067
Sliding Tine	Sliding Tine Pallet Fork with 48" Tines	560/254	5500/2495	48/1219
Sliding Tine	Sliding Tine Pallet Fork with 54" Tines	579/263	5500/2495	54/1372
