

### EDGE® MINI-BACKHOE

Take full advantage of your skid loader or track loader's mobility with EDGE mini-backhoes. Perfect for digging trenches and footings, the EDGE mini-backhoe is available as a "fixed" unit or as a unit "with swing".

### OPERATIONAL BASICS

The "fixed" mini-backhoe mounts quickly and easily to most skid loaders and track loaders. It has a digging depth of 73", an overall reach of 75" from the mounting plate, and a dig force of 3895 pounds.

The mini-backhoe "with swing" features in-cab electric controls and a 140 degree rotation cushioned swing cylinder for smooth operation. This model has a 76" digging depth, 78" digging reach and 3800 pound digging force.

Both EDGE mini-backhoes come fully assembled (less bucket) and use the same five buckets used on the EDGE 485 backhoe: the 10", 12", 16", 18" and 24" buckets. Hoses and hydraulic couplers are included, and stabilizers are not required. A relief valve is required in the bucket tilt circuit of the skid loader or track loader. (Check skid/track loader OEM to verify)

### SPECIFICATIONS

Model	Overall Width (in/mm)	Digging Depth (in/mm)	Bucket Dig Force (lbf/kN)	Weight (lbs/kg)
MH73 (Fixed)	47.5/1207	73/1854	3895/17.3	395/179
MHS76 (With Swing)	47.5/1207	76/1930	3800/16.9	535/243

### FEATURES

- Digs trenches over 6' deep
- Available as a fixed unit as well as "with swing"
- Extremely economical and efficient
- No stabilizers required; quickly dig trenches or footings
- 10", 12", 16", 18" and 24" buckets available
