

## MATERIAL UNROLLER

### EDGE® MATERIAL UNROLLER

The EDGE material unroller is a must have attachment for any landscaping company. Contractors will find themselves up to three times more productive with half of the labor!

### OPERATIONAL BASICS

The EDGE material unroller's stem is used to pick up erosion control material rolls off of a truck, and can hydraulically pivot 180 degrees to unroll erosion control material on either side of the machine. It has a free wheeling stem hub, and the arm floats above or below horizontal position; it can be locked into an upright position for transporting as well.

### SPECIFICATIONS

	Model	Weight (lbs/kg)	Length (in/mm)	Dia. (in/mm)	Max. Roll Weight (lb/kg)	Core Size (in/mm)	Pivot (degrees)
