

INVERTED LOG SPLITTER

Split wood up to 24" long on the ground, or off the ground.

EDGE® INVERTED LOG SPLITTER

Double your productivity with the EDGE inverted log splitter providing a fast, easy and cost-effective alternative to the back-breaking job of splitting wood. Split wood up to 24" with less time and effort.

OPERATIONAL BASICS

The EDGE inverted log splitter is designed to split logs right on the ground, or to lift and transport logs for splitting directing into a trailer or other location.

Operators can remain in the comfort and protection of the cab while managing all of the controls right from the seat. Position the log with the front of the splitter, lower the splitter over the log and engage the auxiliary hydraulics to split logs up to 24" long.

The splitter on this attachment can also be unbolted from the quick attach and flipped 180 degrees for upright splitting applications. The inverted log splitter comes complete with hoses and flat face couplers.

Powerful cylinder drives 20 tons of force to splitting wedge

SPECIFICATIONS

Model	Weight (lbs/kg)	Hyd. Req. (gpm/lpm)	Cylinder Size(s) (in/mm)	Power	Max. Log Length (in/mm)
LSI24S	339/179.2	10-20/38-76	4x24/102x610	20 Tons	24/610

FEATURES

- No need to lift heavy wood for splitting
- Operate controls from the comfort of the cab
- Splitter can be converted for upright splitting applications
- Split logs up to 24" long
