

EDGE® LOG PULLER/ROTATING GRAPPLE

It's not just for logs! The EDGE log puller/rotating grapple is a versatile attachment designed to lift and handle heavy, awkward size material such as logs, culverts, water pipes, telephone poles and more with controlled precision.

OPERATIONAL BASICS

Load, unload and transport material up to 1500 lbs (680 kg). The serrated cradle of the grapple steadies material in-line for straight-on loading or transport. The grapple tines open to a maximum of 39" (991 mm) for grappling large objects and fold together as tight as 3" (76 mm) in diameter for holding pipe, brush or smaller material.

The spring centered grapple rotates up to 180 degrees and features spring-centered return, lateral lock and in-line lock positions for handling material at different angles. The EDGE log puller/rotating grapple comes complete with a hose saver kit, hoses and flat face couplers.

SPECIFICATIONS

| Model | Weight (lbs/kg) | Overall Width (in/mm) | Rotation | Depth (in/mm) | Overall Width (in/mm) | Grapple Opening (in/mm) | Cap. (lb/kg) |
|-------|-----------------|-----------------------|-------------|---------------|-----------------------|-------------------------|--------------|
| LP40 | 477/216 | 48/1219 | 180 degrees | 48/1219 | 48/1219 | 3-39/76-991 | 1500/680 |

FEATURES

- 180° rotation with spring center grapple for handling material at different angles
- Lift and transport logs, culverts, pipe or poles from 3" (76 mm) to 39" (991 mm) in diameter
- Serrated cradle steadies material for controlled leverage of load
- Handles loads up to 1500 lbs (680 mm)
