

### EDGE® IN-CAB BACKHOE

The EDGE in-cab backhoe attachment allows the operator to remain in the comfort and protection of the cab while operating the backhoe and the skid loader and track loader controls. Increase production and operator cycle times by controlling the stabilizers, boom, dipper, bucket and also move the machine without ever leaving the cab.

### OPERATIONAL BASICS

The EDGE in-cab backhoe features include a powerful 9'4" (2850 mm) digging depth, 10'11" (3340 mm) reach and 180 degree pivot rotation. Vertical stabilizers and 40" (1016 mm) side-shift allow you to operate next to buildings, fence lines or other obstacles. Cushioned swing pads at three points offer smooth stop at maximum swing and stick retract.

Four bucket sizes are available from 12" (300 mm) to 24" (600 mm) for any size trenching job. Comes standard with auxiliary hydraulics, hoses and flat face couplers.
