

## PICKUP / HOPPER BROOM

### EDGE® PICKUP/ HOPPER BROOM

Broom attachments are selected by the material to be removed and the surface on which the broom is used. The EDGE pickup/hopper broom is a bi-directional collection broom which allows the operator to sweep in forward and reverse, and gives excellent performance in milling, material pickup, road maintenance and job-site cleanup. This is a cost effective investment for contractors and rental houses.

### OPERATIONAL BASICS

The EDGE pickup/hopper broom is a single-motor broom and comes in widths ranging from 60" (1524 mm) to 84" (2133 mm). The pickup/hopper broom is also available with a waterless dust abatement system in widths ranging from 60" (1524 mm) to 84" (2133 mm). An optional dust control kit and an optional gutter brush attachment help remove debris from the curbside and hard to reach areas. This unit comes complete with hoses, couplers and a bolt-on cutting edge.

### SPECIFICATIONS

| Model    | Weight (lbs/kg) | Overall Width (in/mm) | Hyd. Req. (gpm/lpm) | Brush Dia. (in/mm) | No. of Brush Segments | Capacity (f³/m³) |
