## COMFORT and SAFETY

### PREMIUM SEAT

Standard deluxe, high-back mechanical suspension seat or an optional air-ride seat for operator comfort.

### OPERATOR PRESENCE

Brakes are applied and hydraulics are disabled whenever the operator raises the restraint bar, leaves the seat or switches off the ignition.

### CREATURE COMFORTS

Dome light, cup holder, two 12-volt outlets, and multiple adjustable air vents.

### ARMRESTS/RESTRAINT BARS

All instrumentation and fully adjustable joystick control towers are conveniently located on the armrests for easy access. High-mounted restraint bars provide ample clearance for the operator's legs.

### PRESSURIZED CAB

Optional, pressurized sealed cab enclosure with sound reduction material and rear-mounted air filter provides a cleaner and quieter operating environment.

### VISIBILITY

A cab-forward design enhances the view to the bucket cutting edge from the operator's seat. Extra-large side screens combined with a low-profile lift arm design provide a wide field-of-view to the side work areas.

## LESS DOWNTIME PUTS MONEY IN YOUR POCKET

● **IDEALTRAX™ INDUSTRY EXCLUSIVE AUTOMATIC TRACK TENSIONING SYSTEM**

- ▶ Eliminates the need for manually tensioning the tracks on the loader before operation, saving valuable time on the jobsite.
- ▶ Increases the life of the tracks (*up to 15%\* in tested conditions*), sprockets and bearings by ensuring the proper tension immediately upon start-up and during use, and tension release when the machine is shut down.
- ▶ Track changes in the field are facilitated with the simple flip of a switch in the rear compartment. Removing a track without the IdealTrax™ system can take up to one hour per track. With IdealTrax™, it takes just minutes.

\*Track life improvement varies greatly depending on conditions, application and upkeep; results may vary.
