

EDGE® HD ROTARY BRUSH CUTTER

The EDGE heavy-duty rotary brush cutter is powerful enough to handle your most demanding cutting jobs. This aggressive brush cutting machine is engineered to cut brush and trees up to 8" (203 mm) in diameter and clear even the most rugged and overgrown terrain.

OPERATIONAL BASICS

The EDGE heavy-duty rotary cutter is a direct drive unit featuring 3 steel blades for the most efficient mulching of trees and a deck support structure made of 3/8" A-36 steel. A steel cushion valve protects the motor and this heavy-duty brush cutter requires 30-40 gpm high flow hydraulics. This brush cutter is tough enough to provide many years of dependable service.

SPECIFICATION

Model	Weight (lbs/kg)	Hyd. Req. (gpm/lpm)	Working Width (in/mm)	Max. Tree Size (in/mm)	No. of Blades
RC72H (High Flow)	2072/940	30-40/114-151	72/1828	8/203	3

FEATURES

- Heavy-duty cutter mulches brush and trees up to 8" (203 mm) in diameter
- Three 5/8" x 5" A-5150 steel blades for efficient mulching
- 3/8" A-36 steel deck support for long life
- Steel cushion valve for motor protection
- Steel frame for gearbox for positive alignment
- Balanced stump jumper for smooth operation
