

EDGE CHIPPER

The EDGE® standard-flow EDGE Wood Chipper attachment turns brush, branches and leaves into perfect size chips for use as ground cover for pathways or in flowerbeds to control weeds, retain moisture, and improve composting processes. Perfect for woodlot owners, arborists and municipalities to dispose of brush and branches.

OPERATIONAL BASICS

The wood chipper attachment features a 20" x 20" self-feeding hopper opening to handle large and awkward size branches up to 4 inches in diameter and angles brush against the blades as it pulls material into the chipper. Air intake vents maximize blowing force to power the chips out of the chute up to 20 feet.

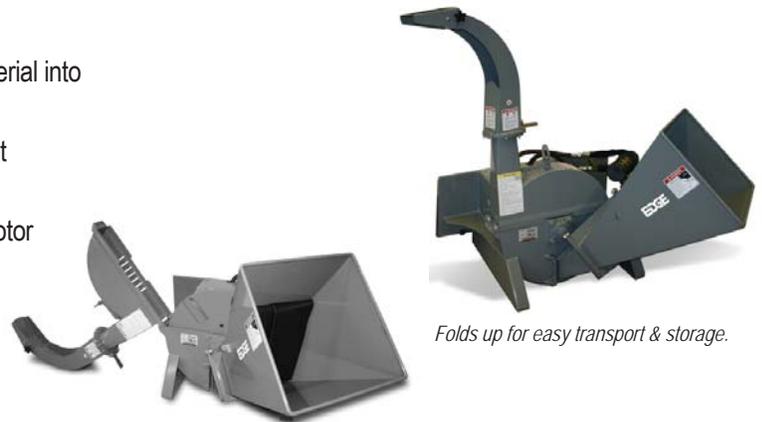

The 25 inch rotor features 2 hardened steel, reversible chipping blades placed at 180 degrees to each other to keep the rotor in balance. The blades work together to cut, shear and shred the wood as it moves through the machine, rotating 1,000 rpm at 24 gpm.

SPECIFICATIONS

Model	Weight (lbs/kg)	Hyd. Req. (gpm/lpm)	Core Size (in/mm)	Max. Opening (in/mm)	Blade Type	Fan Dia. (in/mm)	Discharge Distance (ft/m)
WC4	740/336	14-24/53-91	4x10/102x254	20x20/508x508	2 Reversible	25/635	20/508

FEATURES

- Standard-flow, chips branches up to 4" in diameter
- 20"x20" self-feeding hopper angles the brush and pulls material into the chipper
- Air intake vents power material out of the chute up to 20 feet
- 25 inch rotator with hardened steel reversible blades
- Twig breaker breaks up long branches as it feeds through rotor
- Folds for easy transport and storage

Folds up for easy transport & storage.
